ralmurayshid.99@gmail.com

Riyadh, Saudi Arabia

SUMMARY

I'm a Certified Artificial Intelligence Engineer (CAIE) with expertise in Machine Learning, Data Science, and Large Language Models (LLMs). I specialize in Neural Networks using TensorFlow, data manipulation with NumPy and Pandas, and visualization with Matplotlib. My experience also includes Prompt Engineering and optimizing AI models. Additionally, I have a solid foundation in Web Development (React, JavaScript, C#, .NET) and Game Development using Unity and C#.

EDUCATION

Umm Al-Qura University | Mecca, Saudi Arabia

Bachelor of Information System | 3.33/4 | August 2018 – March 2023.

EXPERIENCE

Netways | Riyadh, Saudi Arabia

AI & CRM Engineer | March 2024 – Present.

- Participated in digital transformation initiatives through the implementation and customization of Microsoft Dynamics 365 solutions aligned with business requirements.
- Gathered, analyzed, and translated business requirements into functional and technical specifications for CRM enhancements and automation projects.
- Supported the configuration and deployment of digital platforms and applications for government entities including GACA.
- Developed Power Apps solutions to automate business processes and improve operational efficiency.
- Conducted gap analysis between business requirements and existing system capabilities to recommend suitable solutions.
- Developed and integrated AI chatbot solutions with Power Platform applications to enhance user experience and service delivery.
- Managed environment migrations between Development and UAT environments while ensuring system quality and compliance.
- Configured security roles, user permissions, and access controls according to governance and information security requirements.
- Developed business rules and workflows based on approved BRDs and stakeholder requirements.
- Performed Quality Assurance (QA), defect analysis, and issue resolution through Azure DevOps.
- Prepared datasets and knowledge repositories to support AI-powered solutions and digital initiatives.
- Conducted User Acceptance Testing (UAT) sessions and coordinated with stakeholders to validate system functionality.
- Collaborated with multidisciplinary teams to ensure project deliverables aligned with business objectives and timelines.
- Led Agile project activities including planning, progress tracking, deployment coordination, and risk management.
- Reviewed technical solutions and code implementations to ensure compliance with business and operational requirements.

SFDA (Saudi Food & Drug Authority) | Riyadh, Saudi Arabia

Software Engineer IT Business Developer | Tamheer | July 2023 – February 2024.

- Prepared and analyzed Software Requirement Specifications (SRS) and Business Requirements Documents (BRDs) for five enterprise systems.
- Conducted business analysis sessions with stakeholders to gather, document, and validate functional and technical requirements.
- Performed gap analysis and requirements assessments to identify opportunities for process improvement and digital transformation.
- Coordinated with development teams and business users to evaluate system features, prioritize enhancements, and align solutions with organizational needs.
- Supported solution design activities through wireframing, process mapping, and functional prototyping.
- Participated in project planning, feasibility discussions, and technology assessments for new digital initiatives.
- Developed proof-of-concept applications using .NET technologies to validate business requirements and solution approaches.
- Prepared technical documentation and implementation plans to support system development and deployment activities.
- Utilized AI tools and prompt engineering techniques to improve productivity and accelerate requirements analysis and documentation.

Smart Methods | Mecca, Saudi Arabia

AI Programming COOP Summer Training | June 2022 – August 2022.

- Created a robotic arm using the Robot Operating System (ROS).
- Installed robotic environments and frameworks effectively using LINUX systems.
- Conducted robot sensor simulations and configurations utilizing Gazebo software.
- Coded and developed a functional speech-to-text website interface.

Smart Methods | Mecca, Saudi Arabia

IOT Programmer Summer Training | June 2021 – August 2021

- Used HTML to develop a website controlling robotic arms efficiently.
- Created a chatbot for robots using the IBM platform tools.
- Utilized PHP to design and manage a functional database system.
- Integrated web technologies to enhance robotic arm control and communication.

OTHER

- **Certificates:**
- Certified Artificial Engineer CAIE™ USAII | September 2025
- IBM AI Professional Certificate | January 2025.
- Japanese Language Proficiency test | January 2025
- Tensorflow for Deep Learning bootcamp | August 2024
- Asp.Net Core 8.0 (.NET 8) Complete Guide | May 2024
- Complete AI & Machine Learning, Data Science Bootcamp | May 2024
- Complete C# Master Class | May 2023
- 200 Japanese Kanji | May 2023
- The Complete Web Development Bootcamp | August 2023.
- Unity On Demand Foundation Learning Plan | SDA Academy | July 2023.
- Ultimate Microsoft Office; Excel, Word, PowerPoint & Access | March 2023.
- Responsive Web Design in Adobe XD | December 2022.

Business & Digital Transformation

- Business Analysis
- BRD Preparation
- Gap Analysis
- Requirements Gathering
- Process Mapping
- Solution Design
- Digital Transformation
- UAT
- Agile Methodology

Enterprise Platforms

- Microsoft Dynamics 365
- Power Apps
- Power Automate
- Azure DevOps

Programming & Development

- C#
- .NET 7/.NET 8
- JavaScript
- Python
- SQL
- HTML/CSS

Data & AI

- Data Analysis
- Machine Learning
- Generative AI
- NLP
- LLMs
- RAG
- TensorFlow

DevOps & Cloud

- AWS
- GCP
- Docker
- Jenkins
- CI/CD
